## Company profile

- Gold Coast based engineering and project management consultancy founded in 2015.
- Supports government, councils, transport/infrastructure, property/development, contractor and industry clients.
- Australia-wide support with practical, evidence-based delivery methods.

## Core capability

- RPEQ civil and structural engineering pathways where scoped and evidenced.
- ISO 9001 / ISO 45001 / ISO 14001 management-system trust signals.
- Project delivery, contract administration, inspections, certifications, digital evidence and embedded resources.

## How ALIGA can help

- Define scopes, deliver projects, close out handover issues and provide specialist resources.
- Prepare procurement-ready capability responses and project sheets.
- Use AI and automation only where they improve clarity, traceability and speed.

## How ALIGA can help

Define the work, deliver the work, close out difficult handover issues, provide the right people and use digital/AI tools intelligently with human oversight.
